

Community Emergency Response Team (CERT) Training

CERT training incorporates a practical approach to handling emergency and disaster situations. CERT promotes readiness, self-sufficiency, teamwork, rescuer safety, and doing the greatest good for the greatest number of people. Students learn how to organize themselves during a disaster, manage utilities, extinguish small fires, search for and rescue survivors, and provide basic disaster medical care.

CERT training will be delivered over the course of three days. Only those who complete all training hours, including skills practice, will receive a certificate of completion and free CERT kit.
