Fire Pumps Emergency Secondary Power Supply Verification

Date: _____ Address: _____
Case Number: _____ APN #: _____

This letter serves as verification that the electric utility provider has deemed their power generation and delivery systems as a reliable source of emergency back-up power in accordance with the following criteria:

1. The source power plant has not experienced any shutdowns longer than 4 continuous hours in the year prior to plan submittal.
2. Power outages have not routinely been experienced in the area of the proposed facility caused by failures in generation or transmission.
3. The normal source of power is not supplied by overhead conductors outside the proposed facility.

Applicant/Developer: _____

By: _____ Date: _____

Title: _____

Electric Utility Provider

Name of Utility Provider: _____

Address: _____

Telephone: _____ Date: _____

By: _____ Title: _____

Note: The completion and submittal of this letter to the Riverside County Fire Department, Office of the Fire Marshal, shall serve as documentation that the electric utility provider deems their power generation and delivery system(s) as a reliable source of emergency back-up power.
